PROFESSIONAL SUMMARY

Results-driven Back-End Developer specializing in PHP and Laravel ecosystems. Proficient in crafting responsive front-end experiences and managing efficient MySQL databases. Leverages a strong QA background to build maintainable, bug-free code and optimize the development lifecycle.

EXPERIENCE

Associate Back-End Developer
Olive Digital Pvt. Ltd. — Jun 2025 - Present

- Developed and maintained scalable backend systems using PHP and Laravel.
- Optimized MySQL queries and indexing, reducing average query response time by up to 30%.
- Collaborated with cross-functional teams to architect and deploy backend solutions for new product features.
- Used AI-assisted tools, including Claude, to accelerate debugging and documentation, cutting turnaround time on routine tasks by around 25%.
- Streamlined internal workflows by identifying and resolving codebase bottlenecks, reducing bug resolution time by nearly 20%.

QA Intern
Remote - ETL Online — May 2025 - July 2025 (3 months)

- Gained hands-on experience in writing traceability matrix & test cases for various modules.
- Worked on Jira for task tracking & bug reporting.
- Actively collaborated in QA activities for online projects in a remote team environment.

Customer Sales Representative
Next Gen BPO Solution — Jul 2024 - Nov 2024 (5 months)

- Communicated product features and benefits effectively to potential clients.
- Assisted in driving a 20% increase in sales by implementing effective communication strategies.

Web Development Intern
Codsoft — Aug 2023 - Sep 2023 (2 months)

- Completed a remote internship focused on web development, gaining exposure to HTML, CSS, and JavaScript.

Customer Sales Representative
Ascent Communique — Mar 2020 - Jun 2021 (1 year 4 months)

- Handled outbound calls to clients to introduce company products/services.
- Identified customer needs and recommended suitable solutions.
